WORLD BANK GROUP

MISSION 300 CDMU CONVENING

DAY 1

MAY 11, 2026

Mission 300 Overview & Energy Compacts

IN COLLABORATION WITH

The Rockefeller Foundation

Global Energy Alliance for People and Planet
GEAPP

SUSTAINABLE ENERGY FOR ALL

SESSION 2

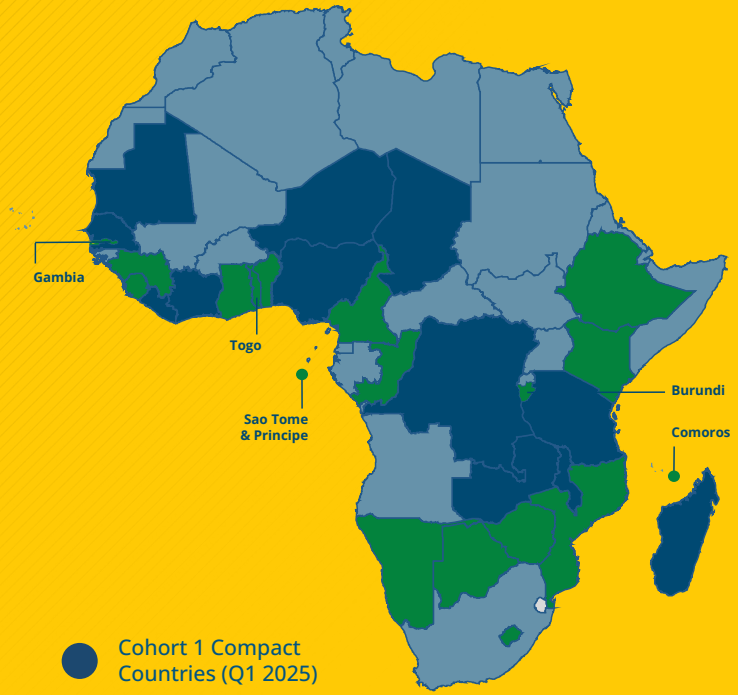

MISSION 300 ENERGY COMPACT IMPLEMENTATION PROGRESS

Country Progress to Date

LOLADE ABIOLA

Chief of Staff, Sustainable Energy for All (SEforALL)

INTRODUCING M300 ENERGY COMPACTS AND COMPACT COUNTRIES

COHORT 1

- Chad
- Côte d'Ivoire
- DR Congo
- Liberia
- Madagascar
- Malawi
- Mauritania
- Niger
- Nigeria
- Senegal
- Tanzania
- Zambia

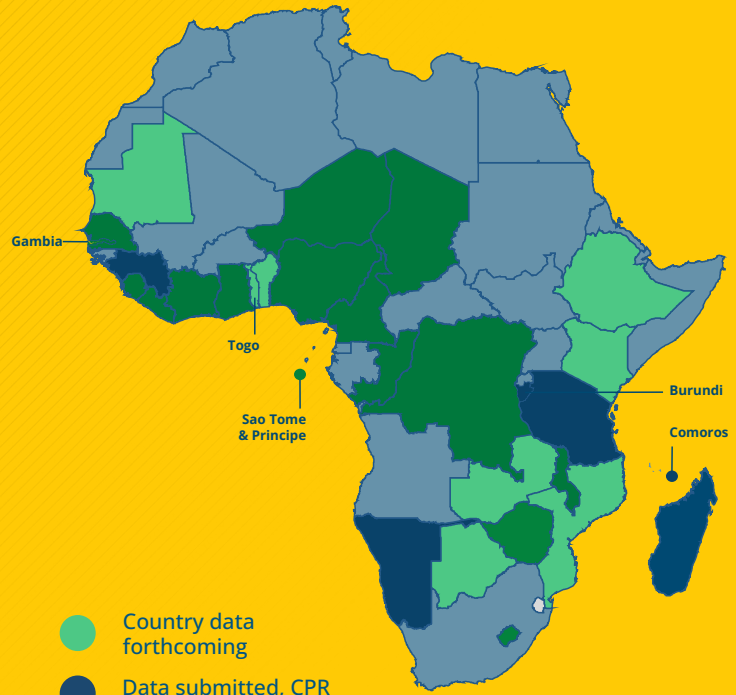

30

National Energy Compacts across **Cohort 1 & Cohort 2** countries

COHORT 2

- Benin
- Botswana
- Burundi
- Cameroon
- Comoros
- Ethiopia
- Gambia
- Ghana
- Guinea
- Kenya
- Lesotho
- Mozambique
- Namibia
- Republic of Congo
- Sao Tome and Principe
- Sierra Leone
- Togo
- Zimbabwe

MISSION 300 COMPACT IMPLEMENTATION STATUS

30 **MISSION 300 COUNTRIES AT VARIOUS STAGES OF COMPACT IMPLEMENTATION**

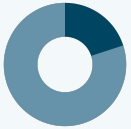

Additional 9 countries planning to launch this year

(Cohort 3: Angola, Burkina Faso, Cabo Verde, Central African Republic, Djibouti, Gabon, Rwanda, Somalia, Uganda)

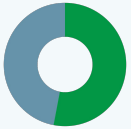

290+ **PRIORITY REFORM ACTIONS IDENTIFIED THAT CAN UNLOCK INVESTMENT**

Outlining critical drivers to high impact progress towards compact delivery

22 **COUNTRIES ACTIVELY PROVIDING DATA ON PROGRESS ACROSS COHORT 1 AND COHORT 2**

Accelerate project delivery, strengthen enabling environments, and expand electricity access more rapidly

16 **MISSION 300 COUNTRIES HAVE SUBMITTED VALIDATED COMPACT PROGRESS REPORTS TO AMPLIFY PROGRESS WITH PARTNERS**

Compact Progress Reports (CPR) can be shared publicly by CDMU during national and international events. The upcoming Africa Energy Forum in June represents a key opportunity

THE BENEFITS OF DEMONSTRATING PROGRESS

Through National Energy Compact Progress Reports

THE VALUE OF VALIDATED MISSION 300 PROGRESS

- Demonstrates implementation progress, accountability and transparency
- Strengthens coordination between countries and Technical Assistance / Development Partners
- Provides a monitoring framework across priority reform actions and all five pillars of the Compacts
- Signals market readiness to unlock investment opportunities

CONNECTING THE DOTS - ENERGY COMPACTS TO CONTINENT-WIDE ENERGY TRANSFORMATION

The Compacts are the mechanism that ties Mission 300 together, accelerating implementation progress across Africa through a model inspiring the world.

1

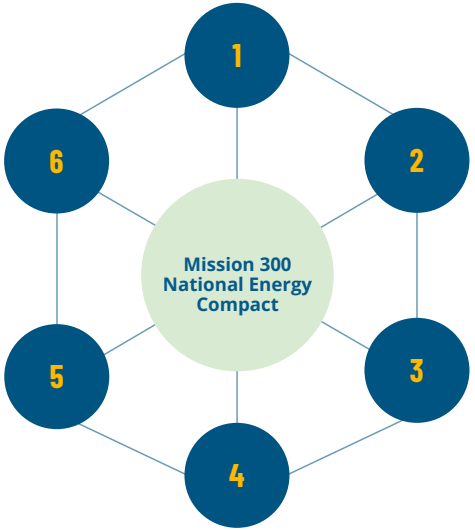

Energy Compacts are the mechanism that ties Mission 300 together providing a practical framework for translating continental ambition into country-level delivery.

2

Provide clear structure to mobilize technical assistance, concessional finance, policy reform support, and investment pipelines for more effective coordination.

3

Operational architecture through which Mission 300 moves from commitments to measurable outcomes, a model inspiring other countries and sectors globally.

4

The scale of ambition and groundbreaking partnership architecture behind it around a common implementation framework.

5

Shaping and tracking reform implementation in real time to identify common bottlenecks, technical assistance needs and global responses rapidly.

6

Standardization of data and insights to rapidly support implementation progress at a scale that is a once in a lifetime opportunity for every single one of us.

WORLD BANK GROUP

MISSION 300 CDMU CONVENING

DAY 4

MAY 14, 2026

Critical links: Day 4 Run of show

IN COLLABORATION WITH

The Rockefeller Foundation

Global Energy Alliance for People and Planet
GEAPP

SUSTAINABLE ENERGY FOR ALL

WHAT TO EXPECT ON DAY 4: MRL CAPACITY BUILDING — A FULL-DAY DEEP DIVE

Day 4 Goal
Leave with a clear understanding of the M300 MRL system, a practical MRL toolkit for your CDMU, hands-on CPR experience, and a clearer pathway and next steps for MRL implementation in your country.

1 Mission 300 MRL Overview

What success looks like

Sets the M300 MRL vision and what good MRL looks like — grounding Day 4 in the real challenges CDMUs face across all five compact pillars.

2 MRL Tools

Big picture foundational building blocks

Shared M300 MRL Framework in action: how real-time data drives decisions across all five compact pillars and shapes the top five MRL priorities for the next six months.

3 Compact Progress Reporting Deep Dive

CPR & Feedback Loops:

Hands-on walkthrough of the CPR template, from data collection to dissemination, with country showcases of monitoring systems that work. Round tables surface what is working, what is not, and practical improvements for the next reporting round.

4 Applied Innovative Solutions

Big picture applied examples:

From ready-to-use Excel tools to automated dashboards, applied solutions across the full MRL spectrum are illustrated through real-life experience. Participant feedback shapes the next 6–12 months of CDMU MRL tool development.

OBJECTIVES OF TODAY | OBJECTIFS DE LA JOURNÉE SUIVI - EVALUATION (MRL)

Day 4 of the CDMU Convening aims to build shared understanding, practical capability, and a clearer pathway for MRL design and implementation across CDMUs and Mission 300 partners.

Le 4ème jour de la CDMU Convening vise à établir une vision commune, à renforcer les capacités pratiques et à définir une feuille de route plus claire pour les process de Suivi, Reporting et Apprentissage (MRL) au sein des CDMU et parmi les partenaires Mission 300.

1

CLEAR UNDERSTANDING OF CDMU MANDATE & CONTRIBUTION TO MISSION 300 GOAL

Compréhension claire du mandat de la CDMU et de sa contribution à l'objectif de l'initiative Mission 300

2

SHARED MONITORING, REPORTING & LEARNING FOUNDATIONS WITH PRACTICAL INNOVATION USE CASES

Fondements communs en matière de Suivi, Reporting et Apprentissage (MRL), avec des cas pratiques

3

CLEAR, STREAMLINED PROGRESS REPORTING & DATA STANDARDS

Reporting de suivi des progrès clair et simplifié, et normes de données harmonisées

4

STRONGER MONITORING, REPORTING COLLABORATION & COMMUNITY OF PRACTICE

Collaboration MRL renforcée et communauté d'apprentissage

SESSION 20

STRATEGIC OVERVIEW OF MISSION 300 MONITORING, REPORTING & LEARNING

Vision Setting

QUINN REIFMESSER

Head, Monitoring, Evaluation & Learning, SEforALL

WHY A MONITORING, REPORTING & LEARNING FRAMEWORK IS CENTRAL TO MISSION 300

THE OPPORTUNITY

Common Framework to support Efficiency & Scale

Revolutionary coordination with the potential to influence unprecedented change

Standardization

A once in our lifetime opportunity to influence standardization to this extent as we track progress and common solutions

Urgency

Decisions can be made faster than business as usual—evidence and data must inform timely action

M **MONITORING**
Systematically tracking progress and results

R **REPORTING**
Assessing what's working and why

L **LEARNING**
Applying findings to improve future action

THE BACKBONE

A Monitoring, Evaluation & Learning Framework creates the common language, data and information flow

Recognizing common challenges and enabling partners to make decisions and act on evidence in real time

MISSION 300 AT A GLANCE: A HOLISTIC APPROACH TO AFRICA'S ENERGY CHALLENGE

Jobs, economic development, health, education, quality of life, gender equality, climate resilience

300 MILLION AFRICANS WITH ACCESS TO AFFORDABLE, RELIABLE, AND ADEQUATE POWER

+

Electricity access for productive uses, social infrastructure, and businesses

Scaling up Connections

Least-cost Generation

Regional Integration and Trade

Sector and Utility Improvements

Scaled up investments

Government Reforms

Partnerships

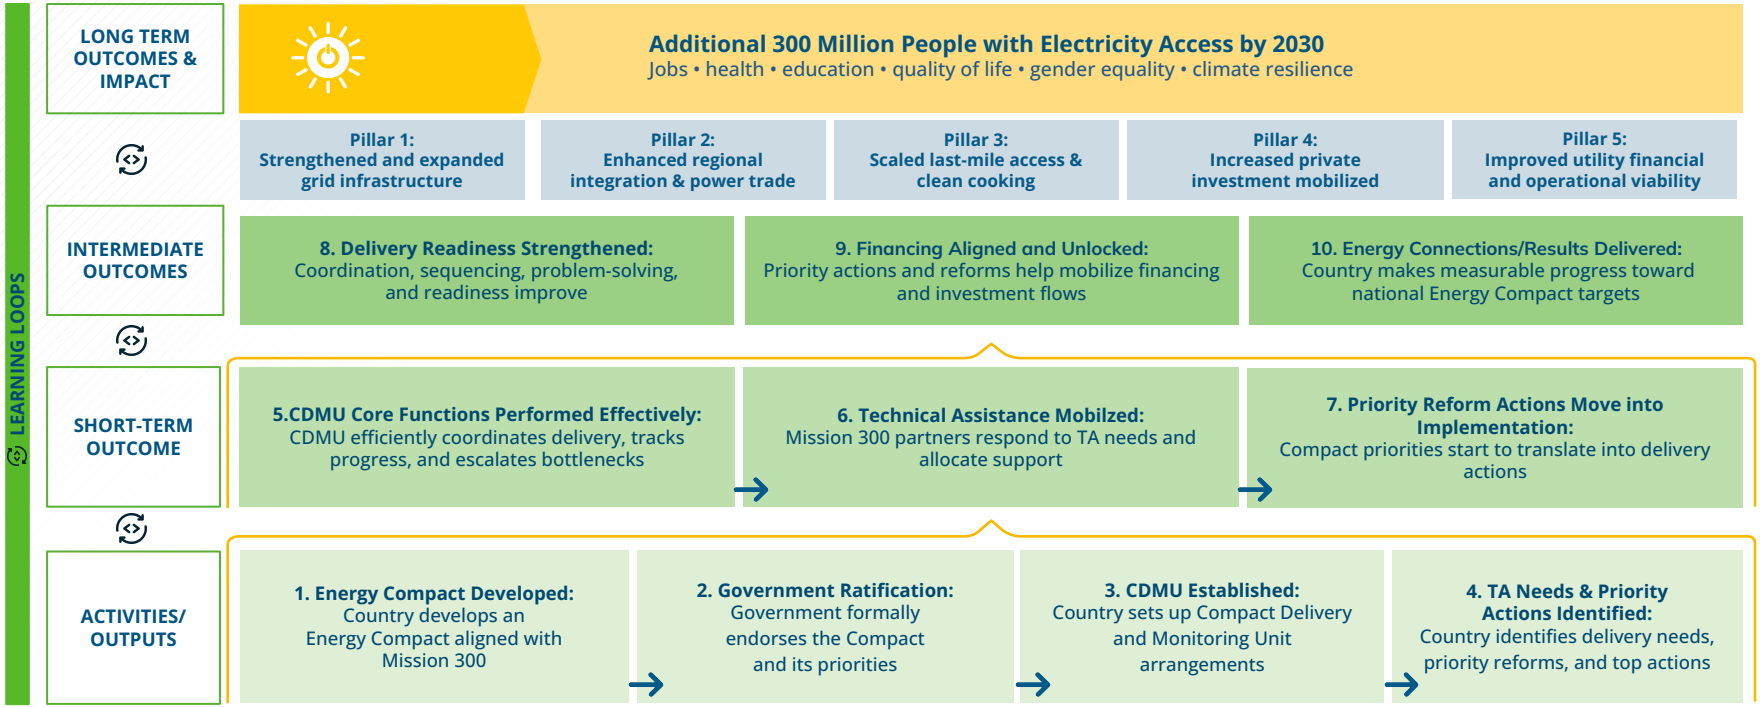

Private Sector

CONNECTIONS ALONE ARE INSUFFICIENT: This is why the World Bank Group & the African Development Bank work across the full energy value chain to ensure affordable and reliable power

MISSION 300 NATIONAL ENERGY COMPACT JOURNEY FROM INCEPTION TO IMPACT

A simple pathway from Compact development to implementation, financing, and connections

This high-level Theory of Change shows the core steps through which a country enters Mission 300, operationalizes support, and translates priorities into implementation and results.

REFLECTING WHAT SUCCESS LOOKS LIKE FOR A CDMU

Contribute to the Success of Mission 300
300 million people connected to affordable, reliable & adequate power - on-grid, off-grid & clean cooking by 2030

National Electrification Targets Achieved
The ultimate objective of every CDMU is to achieve electrification towards National Energy Compact Targets by 2030.

Reforms implemented, not just committed
Regulations, tariffs, and frameworks enacted and enforced

Data & Evidence that Informs Decision making through a data & learning architecture
that informs swift decision making across the Mission 300 pillars.

Revolutionary Coordination & Advocacy for Mission 300 goals
Collaborating and weaving the red threads across ministries, Mission 300 partners, development partners, private sector,

Does this reflect your understanding of your role?
What have you learned in the last 3 days from another CDMU?
